The title Whole Earth Catalog came from a previous project by Stewart Brand. In 1966, he initiated a public campaign to have NASA release the then-rumored satellite photo of the sphere of Earth as seen from space, one of the first images of the "Whole Earth". He thought the image might be a powerful symbol, evoking a sense of shared destiny and adaptive strategies from people. The Stanford-educated Brand, a biologist with strong artistic and social interests, believed that there was a groundswell of commitment to thoroughly renovating American industrial society along ecologically and socially just lines, whatever they might prove to be. Andrew Kirk in Counterculture Green notes that the Whole Earth Catalog was preceded by the "Whole Earth Truck Store" which was a 1963 Dodge truck. In 1968, Brand, who was then 29, and his wife Lois embarked "on a commune road trip" with the truck, hoping to tour the country doing educational fairs. The truck was not only a store, but also an alternative lending library and a mobile microeducation service. Kevin Kelly, who would edit later editions of the catalog, summarises the very early history this way: 'Here's a tool that

The title Whole Earth Catalog came from a previous project by Stewart Brand. In 1966, he initiated a public campaign to have NASA release the then-rumored satellite photo of the sphere of Earth as seen from space, one of the first images of the "Whole Earth". He thought the image might be a powerful symbol, evoking a sense of shared destiny and adaptive strategies from people. The Stanford-educated Brand, a biologist with strong artistic and social interests, believed that there was a groundswell of commitment to thoroughly renovating American industrial society along ecologically and socially just lines, whatever they might prove to be. Andrew Kirk in Counterculture Green notes that the Whole Earth Catalog was preceded by the "Whole Earth Truck Store" which was a 1963 Dodge truck. In 1968, Brand, who was then 29, and his wife Lois embarked "on a commune road trip" with the truck, hoping to tour the country doing educational fairs. The truck was not only a store, but also an alternative lending library and a mobile microeducation service. Kevin Kelly, who would edit later editions of the catalog, summarises the very early history this way: 'Here's a tool that will make drilling a well, or grinding flour, easier,' Brand would tell [the hippies,] pointing it out in his catalog of recommended tools. But his best selling tool was the catalog itself, annotated by him, featuring tools that didn't fit into his truck. The "Truck Store" finally settled into its permanent location in Menlo Park, California. Instead of bringing the store to the people, Brand decided to create "accumulatively larger versions of his tool catalog" and sell it by mail so the people could contact the vendors directly. Using the most basic typesetting and page-layout tools, Brand and his colleagues created the first issue of The Whole Earth Catalog in 1968. In subsequent issues, its production values gradually improved. Its outsize pages measured 11 by 14 inches (28 by 36). Lat-

The title Whole Earth Catalog came from a previous project by Stewart Brand. In 1966, he initiated a public campaign to have NASA release the then-rumored satellite photo of the sphere of Earth as seen from space, one of the first images of the "Whole Earth". He thought the image might be a powerful symbol, evoking a sense of shared destiny and adaptive strategies from people. The Stanford-educated Brand, a biologist with strong artistic and social interests, believed that there was a groundswell of commitment to thoroughly renovating American industrial society along ecologically and socially just lines, whatever they might prove to be. Andrew Kirk in Counterculture Green notes that the Whole Earth Catalog was preceded by the "Whole Earth Truck Store" which was a 1963 Dodge truck. In 1968, Brand, who was then 29, and his wife Lois embarked "on a commune road trip" with the truck, hoping to tour the country doing educational fairs. The truck was not only a store, but also an alternative lending library and a mobile microeducation service. Kevin Kelly, who would edit later editions of the catalog, summarises the very early history this way: 'Here's a tool that will make drilling a well, or grinding flour, easier,' Brand would tell [the hippies,] pointing it out in his catalog of recommended tools. But his best selling tool was the catalog itself, annotated by him, featuring tools that didn't fit into his truck. The "Truck Store" finally settled into its permanent location in Menlo Park, California. Instead of bringing the store to the people, Brand decided to create "accumulatively larger versions of his tool catalog" and sell it by mail so the people could contact the vendors directly. Using the most basic typesetting and page-layout tools, Brand and his colleagues created the first issue of The Whole Earth Catalog in 1968. In subsequent issues, its production values gradually improved. Its outsize pages measured 11 by 14 inches (28 by 36 cm). Later editions were more than an inch thick. The early editions were published by the Portola Institute, headed by Richard Raymond. The so-called Last Whole Earth Catalog (June 1971) won the first U.S. National Book Award in the Contemporary Affairs category. It was the first time a catalog had ever won such an award. Brand's intent with the catalog was to provide education and "access to tools" so a reader could "find his own inspiration, shape his own environment, and share his adventure with whoever is interested." J. Baldwin was a young designer and instructor of design at colleges around the San Francisco Bay (San Francisco State University [then San Francisco State College], the San Francisco Art Institute, and the California College of the Arts [then California College of Arts and Crafts]). As he recalled in the film Ecological Design (1994), "Stewart Brand came to me because he heard that I read catalogs. He said, 'I want to make this thing called a "whole Earth" catalog so that anyone on Earth can pick up a telephone and find out the complete information on anything. ... That's my goal.'" Baldwin serv-
